FOR IMMEDIATE RELEASE

22nd May, 2024

ELECTORAL COMMISSION'S FRAUDULENT ACTIVITIES THREATEN GHANA'S DEMOCRACY

The Electoral Commission's (Error's Commission) egregious attempt to downplay the missing BVR kits as just 'laptops' is a brazen falsehood and a deliberate attempt to deceive the Ghanaian people. This is a stark example of electoral incompetence, malfeasance and cooperate mismanagement, and we will not stand idly by while the EC sabotages the integrity of our electoral process.

The EC's actions are a blatant assault on the democratic rights of Ghanaians, and we demand immediate answers. What is the EC hiding? Why are they so desperate to conceal the truth about the missing BVR kits? Their claim that their figures are accurate with the political parties is a bald-faced lie, as those figures were calculated and given to them publicly by the opposition NDC on social media therefore we can boldly state that the EC is now Errors Commission.

The current voter register they're preparing is a fraudulent sham, riddled with errors and inconsistencies. It's a ticking time bomb for our democracy, and we will demand an audit to expose the truth. We're not just talking, we're ready to take action. We'll expose the EC's so-called 'academicians' as electoral charlatans who can't even add 1+1, let alone run a credible election.

Ghanaians deserve better than a fraudulent voter register and an EC that engages in deceit and manipulation that indicates clearly the incompetence of Professors who can't supervise the preparation of info graphics let alone adding figures. The EC's decision to keep serial numbers from its stakeholders is a plot to use the missing ones. At least we could've used the serial numbers provided to track all their operational locations and tally data recorded after every end of life.

We (Election Watch Ghana) demand a credible and transparent electoral process, and we'll fight tooth and nail to protect our democracy from the EC's blatant attempts to undermine it. The clock is ticking.
