PNP COMMENDS TRADE MINISTER FOR CEMENT PRICE REGULATION BILL AND CALLS FOR BROADER ECONOMIC REFORMS.

The People's National Party (PNP) commends the Minister for Trade and Industry for introducing a bill in Parliament that aims to regulate cement prices and make cement more affordable for ordinary Ghanaians. This legislation is intended to benefit the Ghanaian people, especially Ghanaian families. Only those seeking to undermine this positive effort would oppose this commendable piece of legislation.

It is evident that some Members of Parliament, prioritize the interests of the businessmen and women who funded their campaigns over those of their constituents. These MPs often oppose policies that seeks to benefit Ghanaian families due to their obligations to their sponsors.

The PNP urges the Ministry of Trade, Ministry of Works and Housing and the Ministry of Agriculture to extend this initiative by introducing additional legislative instruments to regulate food and rent prices, addressing the escalating costs affecting many Ghanaian families.

We call on all Ghanaian families to vote against any political party in the 2024 elections that puts the interests of businesses ahead of the wellbeing of ordinary citizens like yourselves. Be vigilant and oppose any parties that support business practices that are detrimental to the everyday Ghanaian household. Your families deserve leaders who will prioritize your welfare over corporate profits.

WE WILL SUPPORT GHANA THROUGH ALL DIFFICULTIES AND CHALLENGES.
